

ETC Email Setup on Smartphones

How to setup up email accounts on your smartphone using the Apple Operating System.

1. Tap the **MAIL** icon on the home screen.

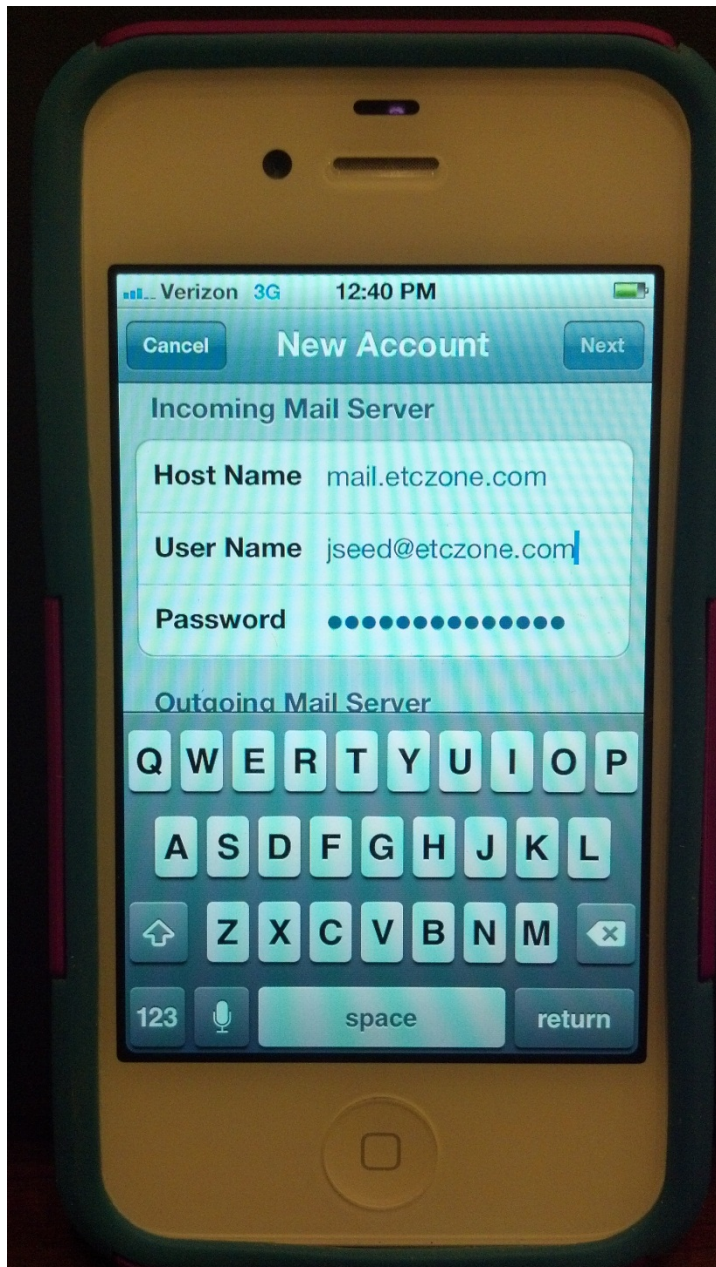

2. Select your email provider: Microsoft Exchange, mobileme, Gmail, YAHOO, Aol., or Other. If you don't see your email provider listed, tap **OTHER**, then **ADD MAIL ACCOUNT**.

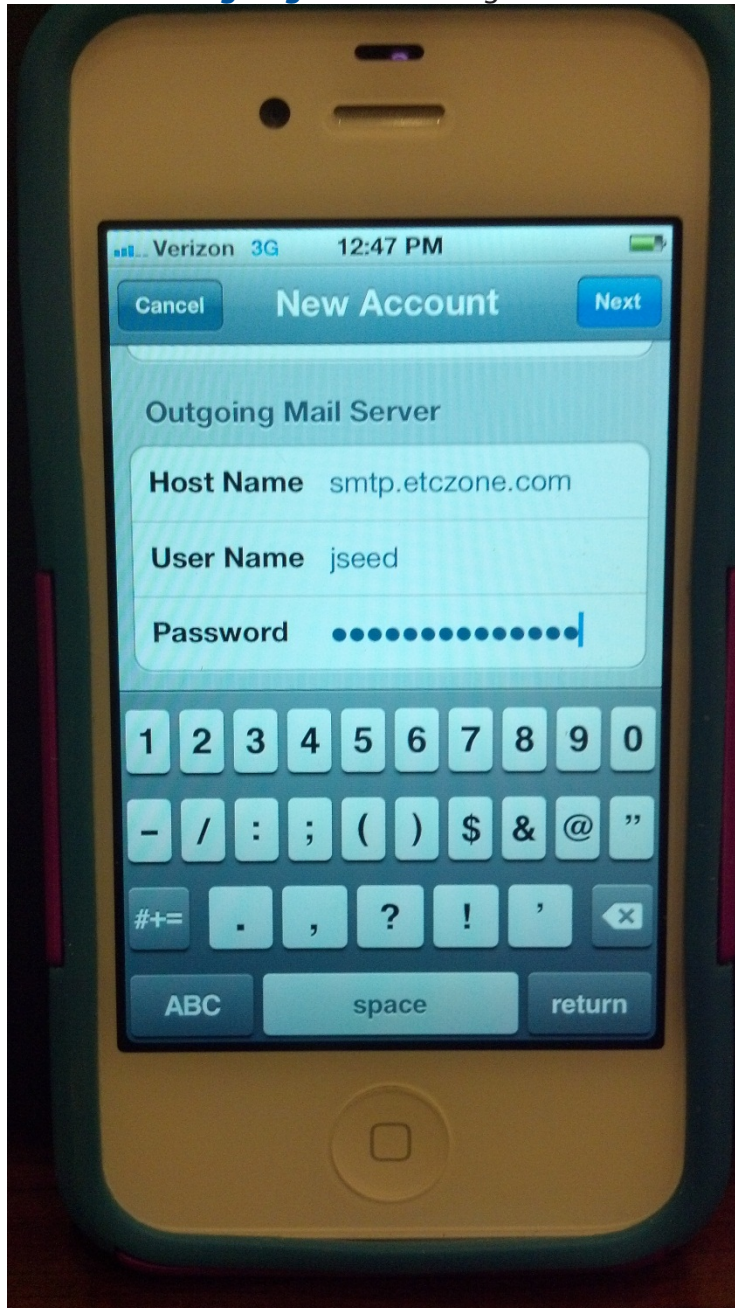

3. Follow the steps and provide the required information to configure your account.

4. Enter **Incoming Server** settings - all should remain as the default except for the server

- Username, Password, Port, Security type, etc.
- In most cases, you will need to enter your full email address for the Username
- IMAP Server
 - ETCZONE customers (**mail.etczone.com**)
 - WEB HOSTED customers (**mail.yourdomain.com**)

5. Enter the **Outgoing Server** settings - all should remain as the default except for the server

- Username, Password, Port, Security type, etc.
- In most cases, you will need to enter your full email address for the Username
- SMTP Server
 - ETCZONE customers (mail.etczone.com)
 - WEB HOSTED customers (mail.yourdomain.com)

Modify an account already setup.

Tap **Settings**, then **Mail, Contacts, Calendars**; tap the name of your account and then your email address. Then tap any information you want to adjust.

Add another account.

Tap **Settings**, then **Mail, Contacts, Calendars**, then **Add Account**; follow the onscreen instructions.
